## Pangaea Takes delivery of supramax M/V Bulk Spirit

Pangaea brings its owned fleet to an even 20 with the delivery of the supramax bulker M/V Bulk Spirit. “The vessel fits perfectly into our operating fleet and will carry various dry-bulk cargoes” said Pangaea CEO Ed Coll. The ship is very efficient on draft and fuel consumption, which are important attributes for Pangaea trades and also in addressing the new marine fuel requirements in 2020.

The vessel was built in 2009 at Oshima Shipbuilding. This makes about 50% of Pangaea’s current fleet “holding the valuable Oshima brand,” Coll said.
